A Specialist Service for IP Firms

What is IP-IT?

Who better to support IP firms and their technology than people who truly understand the IP systems, data and workflows behind it?

IP-IT is a specialised service from **PSS Solutions** and **White Consultancy**, created specifically to support IP law firms with their technology.

We provide independent advisory support across IP systems and the technology environments that support them. Our mission is helping IP firms make better decisions, reduce risk and get more value and reliability from their existing systems and data.

The Challenges IP Firms Face

Many IP firms face growing operational pressure caused by disconnected systems and outdated tech environments.

Common challenges include:

- Underused Microsoft 365 capability
- Heavy reliance on manual data handling
- Increasing complexity across supporting tech
- Disconnected systems and integration complexity
- Limited visibility over data quality and consistency
- Ensuring stability during system upgrades/change

“**Competitive advantage is no longer determined by the systems you own, but by how effectively you use, integrate and evolve them.**”

What We Do

Integration, Data & Systems Advisory

We help firms make sense of complex IP system environments, improving clarity, reducing risk and strengthening how systems and data work together.

Client Data Exchange

We improve how data moves between systems and stakeholders, reducing manual effort and improving accuracy and consistency.

Infrastructure & Cloud Support Services

We advise on the infrastructure supporting IP systems, helping firms address performance, compatibility and operational challenges across cloud, hybrid and on-premise environments.

System Change & Upgrade Support

Our independent advisory support helps firms navigate upgrades, migrations and system change initiatives, understand impacts, identify dependencies and maintain stability across systems and data.

Microsoft 365 & IPMS Integration

Many IP firms underuse their Microsoft licences. By integrating Microsoft 365 with your IPMS, we help automate routine tasks, improve collaboration across teams and with clients, enhance reporting, and reduce manual work.
