

SWITZERLAND

Name: Nadine Stuttle

Company: PSS Solutions

Position: Founder and CEO

Country: Switzerland

Website: www.pss-solutions.com

Nadine Stuttle is the Founder and CEO of PSS Solutions, where she leads the delivery of transformational change across the IP sector by combining operational excellence, digitalisation, and disciplined project execution. With more than 25 years of experience spanning the legal, IP and technology sectors, Nadine is widely recognised and awarded for her deep expertise and thought leadership within the industry.

Early in her career, Nadine established her own career path within the legal profession, moving into operations, and technology at a time when these disciplines were still emerging within the sector. This strategic decision positioned her at the forefront of operational and digital transformation, enabling her to bridge legal expertise, technology platforms and business performance. Her career has been shaped by a deep understanding of how IP systems, processes, and people must align in order to deliver sustainable and scalable change.

Nadine has worked extensively with global corporates and leading IP firms across Europe, North America, and Asia, bringing a truly international perspective to transformation programmes. Her global experience enables her to design and deliver initiatives that scale effectively across jurisdictions while remaining sensitive to regulatory, cultural, and operational differences. She is particularly skilled at navigating complex stakeholder environments, aligning leadership teams and delivering results across multinational organisations where transformation requires both strategic clarity and disciplined execution.

As CEO of PSS Solutions, Nadine partners closely with clients to modernise operating models, streamline processes and embed digital capability across their organisations. She leads high-impact programmes spanning system implementation, process redesign, governance enhancement, and large-scale change management initiatives. Known for her pragmatic and hands-on approach, Nadine remains closely involved

in programme delivery, ensuring that transformation initiatives move beyond strategy and translate into measurable, lasting outcomes. Her focus is always on achieving practical improvements that strengthen operational performance and create long-term value.

In addition to her client work, Nadine serves as a trusted advisor to the private equity market, supporting mergers and acquisitions across the legal, IP, and technology sectors. She provides operational and technology due diligence, integration planning, and post-merger transformation support, helping investors identify operational risks, uncover opportunities for value creation, and execute integrations aligned with strategic objectives. Her ability to quickly assess complex operating environments and design practical solutions has made her a valued partner to investors and leadership teams alike.

Alongside her commercial work, Nadine is deeply committed to supporting the development of talent within the IP and legal operations community. She is passionate about mentoring professionals across the sector, sharing her experience to help others navigate evolving career paths in operations, technology, and transformation. By encouraging knowledge sharing and supporting emerging leaders, she actively contributes to strengthening the future capability and resilience of the industry.

Nadine is recognised as an industry thought leader in operational excellence and digital transformation. Her insights are grounded in decades of practical delivery experience and informed by exposure to global markets and rapidly evolving technology landscapes. She is known for cutting through complexity, providing clear strategic guidance and maintaining momentum through organisational change.

Integrity, accountability and professionalism define Nadine's leadership style and underpin the trusted relationships she builds with clients, investors, and industry peers.
